Trout and Salmon Angling Regulations for Nova Scotia

Together with a list of the more accessible streams

Following is a résumé of the sport fishing regulations applicable to Nova Scotia, and a list of trout and salmon angling waters, which have been prepared for the purpose of furnishing visiting anglers and others with essential information.

It should particularly be noted that the list comprises only such waters as are easily accessible. Many other excellent waters are unlisted as less easily accessible for the average angler.

It should also be noted that there are shown, in each case, the name and address of the fishery inspector in whose territory particular waters are located. Persons desiring any additional information with regard to local conditions pertaining to any of the waters listed can secure it by communicating with the inspector concerned.

ANGLING

"Angling" shall mean the taking of fish with hook and line held in the hand or hook and line and rod, the latter held in the hand, but shall not include set lines or lines tied to a boat.

In angling no one shall use more than one fishing line and such fishing line shall not be provided with more than three separate hooks, provided that in fly surface fishing a double hooked fly may be used.

"Sport fish" shall include salmon, trout and bass.

"Trout" shall include char, speckled trout, salmon trout, gray trout and ouananiche or land-locked salmon.

"Spent" or "slink" salmon shall mean salmon that are in poor condition and that are returning to sea after spawning.

"One day" shall mean from sunrise to sunset.

"Non-resident" shall mean any person domiciled in the province for a period of less than six months.

ANGLERS' PERMITS

Except the owners of summer homes in the province, or those angling in waters in which they own or have under lease the riparian fishing rights, non-residents shall not angle for or take sport fish without having first obtained an angler's permit issued by authority of the Minister of Marine and Fisheries. These permits are obtainable from fishery inspectors.

The fee for such permit shall be at the rate of one dollar per day or five dollars for the season.

One angler's permit only shall be issued to each applicant. Such permit shall not be transferable and can be legally used only by the person whose name appears thereon. The holder of an angler's permit shall be required to produce and exhibit it when called upon to do so by any Fishery Officer or Fishery Guardian.

SUMMARY OF SALMON ANGLING REGULATIONS

Fishing for and catching salmon by angling shall be permissible from the first day of February to the thirty-first day of August in each year, both days inclusive; except in the Island of Cape Breton where such fishing shall be permissible from the first day of June to the last day of September, in each year, both days inclusive; provided that in the streams of the mainland flowing into the Strait of Canso and Chedabucto Bay, such fishing shall be permissible from the first day of June to the fifteenth day of October in each year, both days inclusive.

The number of salmon that may be taken in any one week by an angler shall not exceed thirty.

Angling for salmon shall be restricted to fly surface fishing, and in such fishing the use of any bait or lures other than artificial flies is prohibited.

No salmon or grilse weighing less than three pounds, round weight, shall be retained or kept out of the water. If such salmon or grilse be caught inadvertently it shall, if possible, be returned alive and uninjured to the water from which it was taken by the person catching it. If dead or injured, any such fish may be taken possession of by a Fishery Officer.

No one shall fish for, catch, kill or retain any spent or slink salmon.

The use of a torch or other artificial light in fishing for or catching salmon is prohibited.

No person shall use a dam for the purpose of so regulating the retention or discharge of water as to facilitate the catching of salmon, either by suddenly closing or opening the dam, or in any other manner whatsoever.

SUMMARY OF TROUT ANGLING REGULATIONS

No one shall fish for, catch or kill trout of any kind from the fifteenth day of September in each year, to the fifteenth day of April following, both days inclusive, except in waters of Pictou and Antigonish counties, in which no one shall fish for, catch or kill trout of any kind from the first day of October in each year to the thirty-first day of March following, both days inclusive.

No one shall at any time fish for, catch or kill trout otherwise than by angling. Jigging is strictly prohibited.

Fishing for trout through the ice is prohibited.

No one shall fish for, catch or kill in any of the waters of the Province, in one day, by angling, or shall carry away a greater number of trout than in the aggregate shall weigh more than ten pounds, and no greater number than thirty, though said number weigh less than ten pounds.

The sale, purchase or export of speckled trout, no matter where procured, is prohibited, provided, however, that any non-resident fishing in waters of the province may upon leaving the province take away the lawful catch of two days'

fishing, if the shipment is accompanied by a certificate to that effect from either the local fishery officer in whose district the fish were caught, or from the local station agent adjacent to the locality in which they were caught.

The use of a torch or other artificial light in fishing for or catching trout is prohibited.

SUMMARY OF BASS ANGLING REGULATIONS

No bass of less than two pounds round weight shall be retained. Should any bass of less than two pounds, round weight, be caught it shall, if possible, be returned alive and uninjured to the water from which it was taken by the person catching it.

Should bass caught by angling be sold or offered for sale during the close season for bass net fishing, the proof that such bass was caught by angling shall devolve upon the person selling or offering such bass for sale.

PROHIBITIONS

No fishing of any kind shall be permitted after June fifteenth in each year, in that portion of the Medway river between the dam at Salter's Falls and the iron or highway bridge at the foot of the Falls, as this portion of the river now comprises part of the fishway through the dam at Salter's Falls.

No fishing of any kind shall be permissible within one hundred and twenty-five yards below the lower entrance to the fishway through the dam of the Power Company at White Rock in the Gaspereau River.

No one shall injure or obstruct any fishway or canal built, constructed or used to enable fish to pass over or around any slide, dam or other obstruction or do anything to stop, impede or hinder fish from entering or passing the same or to stop, impede or hinder fish from surmounting any obstacle or leap, nor shall any one fish in any manner within twenty-five yards of the lower entrance to any fish-way or canal, obstacle or leap.

CAPE BRETON ISLAND DISTRICT

INVERNESS COUNTY

Margaree River. Salmon and trout.

The Margaree is one of the world's best salmon streams. It is located in ideal terrain, easy of access, and abounds in wide, deep pools. The river flows through a vale that has few equals for natural beauty. Wide and lovely intervalles sweep away from the banks to the far foothills. From sea to source, a distance of 30 miles the river is dotted with a series of broad pools. The banks are free from obstructions of any kind, and from any of hundreds of stands one may cast at will without fear of his line becoming entangled.

On August 31, 1927, Percy McKenzie of Saint John, N.B., fishing at the Old Bridge Pool, landed a 52½ pound salmon, the heaviest ever taken from the Margaree, and possibly a record for all Nova Scotia.

The river may be reached by automobile from Margaree Harbour, Inverness and Baddeck, distant five, twenty and twenty-eight miles, respectively, from the river.

GUYSBOROUGH COUNTY

St. Mary's River and Connecting Water. Salmon,
Sea trout and Speckled trout.

May be reached by automobile from Sherbrooke located at head of tide, or by motor stage from Antigonish.

The St. Mary's River is now recognized as one of the best salmon streams in Nova Scotia, and the run of fish appears to be increasing each year. The main river divides at Melrose into the West and East branches. Immediately above the forks there is Glenelg Lake which provides a wonderful playground for salmon during the spring and summer months. The run of fish in the West branch arrives later in the season. This branch provides adequate spawning areas for the fall run, but the main river from Sherbrooke to the forks, Glenelg Lake and the East branch offer fine sport fishing opportunities during the season. Fishing commences within 100 yards of the village, and there are twelve pools within a mile up river and a continuation of further spaced pools for twelve miles to the forks. Main roads on each side of the river follow close to the bank for almost the full length of the stream. Fishing commences early in May and sportsmen very often catch the limit. Fishing is invariably good for big fish until the last of July. There are numerous fishing lodges along the river. Salmon, May 1st to August 15th. Sea trout, May and June. Other trout in season.

Fishery Inspector—M. M. Manson, Sherbrooke.
